PROFILE

Dynamic Full-Stack Developer with over 3 years of experience in crafting engaging web applications that enhance user experience and performance. Expertise in developing responsive interfaces using ReactJS, while engineering robust backend solutions with Node.js and Python. Skilled in implementing secure authentication systems and optimising deployment processes through Docker, ensuring seamless integration and high code quality. A collaborative team player dedicated to leveraging emerging technologies and Agile methodologies to drive project success and innovate solutions.

PROFESSIONAL EXPERIENCE

Software developer

2022 – present

Trasna

Dubai,

United Arab Emirates

- Designed and developed responsive and intuitive user interfaces using ReactJS, integrating Figma designs to deliver cohesive and visually appealing UI/UX experiences for multiple projects.
- Engineered scalable backend solutions using Python and Node.js, creating efficient RESTful APIs, implementing microservices architecture, and managing databases with PostgreSQL and MySQL to support growing user demands.
- Implemented custom Single Sign-On (SSO) solutions tailored to meet the specific needs of individual customers, ensuring seamless integration with their systems and secure authentication processes.
- Integrated advanced authentication and authorization systems using Keycloak and LDAP, ensuring secure user management and adherence to compliance standards.
- Developed and optimized CI/CD pipelines, enabling faster, error-free deployments and reducing manual intervention by 40%.
- Containerized and orchestrated applications using Docker, improving scalability and reducing resource consumption across development and production environments.
- Performed unit and end-to-end testing with Cypress, improving software reliability by reducing bugs in production by 25%.
- Enhanced application performance by identifying and resolving bottlenecks, achieving a 20% reduction in page load times through efficient ReactJS and backend optimizations.
- Implemented role-based access control (RBAC) using Keycloak, streamlining user permission management across multiple applications.
- Collaborated with cross-functional teams of designers, developers, and QA professionals, delivering successful projects within strict deadlines and budget constraints.
- Documented workflows and code to streamline team handoffs, reduce onboarding time for new members, and ensure maintainability of projects.

- Provided mentorship to junior developers, guiding them in best practices for coding, debugging, and version control using Git.
- Stayed current with emerging technologies and industry trends, contributing to the implementation of innovative solutions that enhanced project outcomes.

EDUCATION

Bachelor of Technology in Computer Science and Engineering
TocH Institute of Science and Technology

2017 – 2021

SKILLS

ReactJS Development

Python Programming

Node.js Development

RESTful API Development

Single Sign-On (SSO) Implementation

Role-Based Access Control (RBAC)

CI/CD Pipeline Optimization

PostgreSQL Management

MySQL Management

UI/UX Design Integration

Docker Containerization

Cypress Testing

Performance Optimization

ACHIEVEMENTS

- Successfully led the implementation of custom Single Sign-On (SSO) solutions for multiple clients, improving user access management and reducing login times by 40%.
- Contributed to a 15% increase in application efficiency by optimizing ReactJS front-end components and reducing the overall bundle size.
- Implemented secure and scalable user authentication using Keycloak and LDAP, ensuring the compliance of security protocols across multiple enterprise applications.
- Streamlined the integration of external APIs, reducing third-party dependency response times by 20% and ensuring smooth user experience.
- Improved collaboration within the team through Agile practices.
- Mentored and trained 3+ junior developers, enhancing team productivity and knowledge sharing, and promoting best coding practices.
- Consistently recognized for innovation and leadership in driving technology improvements that led to higher operational efficiency.
